Parents are welcome to purchase devices anywhere. There is no preferred platform at Galston High School. Parents should purchase a device that suits their child’s needs and family circumstances.

Learning with Technologies has created a Parent BYOD Purchasing Portal which will be available on our website when BYOD is relaunched at the beginning of next year. Learning with Technologies provides parents with 2 options of devices with varying prices. These devices have been selected by the GHS Technology Committee as being suitable for use in our learning environment. This purchasing program is not managed in any way by Galston High School. It is just providing additional purchasing options for families if required.

Following are the two devices that will be available through Learning with Technologies. Families are encouraged to compare prices with other retail outlets before finalising their decisions.
